DETAILED ACTION

Election/Restrictions

1. Claim 1 is allowable. The restriction requirement of Embodiments 1-7, as set forth in the Office action mailed on 8/25/08, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 8 and 9, directed to separate embodiments are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-25 and 30-35 are allowed.
3. The following is an examiner's statement of reasons for allowance:

- The Examiner found Applicant's arguments, filed on 10/20/10, persuasive, and therefore considers that the references of the Prior Art of record fail to teach, or suggest any obvious combination of the limitations discussed in the previous Office Action, and further comprising the limitations of **(With respect to Claims 1)** an active outer surface in free and movable contact with the open air of said sound field, having a volume which is movable in use at least by movement of said active outer surface, where the volume is one of a) inflated and collapsed or b) extended and compressed, by a variation in a gas pressure therein, and a means for actively varying the gas pressure in said one or more cavities in use; **(With respect to claims 10 and 21)** a structure provided with a roller upon which said at least one sound absorbing devices can be wound and a drive mechanism for rotating said roller; **(With respect to Claims 15)** mounting each body in the open air of the sound field so that the active outer surface, in the open air is in free and movable contact with the open air of the sound field and additionally the active outer surface is free and movable for absorption of acoustic energy from the open air of said sound field; and providing each body with a closed volume having a gas pressure and in which each body is movable in use at least by movement of said active outer surface between states where the volume is one of a) inflated and collapsed or b) extended and t compressed, by a variation in a gas pressure therein, and actively varying the gas pressure of each of the closed volumes of said bodies; **(With respect to claim 18)** when variation of the gas pressure is no longer desired, winding up, on a structure provided with a roller, said sound absorbing device with a drive mechanism; and **(With respect to Claims 30)** a mounting means for

mounting said series of said sound absorbing devices with at least one of said first and second sides having free and movable contact to the open air in the room; having a volume which is movable in use at least by movement of said active outer surface in the open air of the room between states where the volume is one of a) inflated and collapsed or b) extended and compressed, by a variation in a gas pressure therein, and a pressure means for actively varying the gas pressure in said cavities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
